

Dedicated Internet Access

FiberNet now makes it easy to connect to the Global Internet with its Dedicated Internet Access services. Customers can experience the cost-effectiveness of utilizing FiberNet as a single point of contact for their end-to-end Internet Access needs, by bundling FiberNet's local access circuits or colocation services throughout its extensive network.

FiberNet's Dedicated Internet Access is provided through a robust, expertly engineered network with the capacity and reach to support multiple applications on the Internet. FiberNet offers a flexible and scalable set of local access circuit options designed to grow with usage needs, including electrical, optical, and Ethernet circuits.

FiberNet's Dedicated Internet Access service extends any network to the global reach of the most expansive and reliable Tier I networks in the industry. With FiberNet, reliability and proactive service is paramount. The service is backed by industry-leading SLAs and trained technicians monitor services 24 hours a day, 365 days a year from FiberNet's Network Operations Center to proactively identify and resolve problems.

Benefits

- Cost-Effective Pricing
- Flat Rate or Burstable Billing
- Extensive reach through multiple Tier I providers
- Network engineered for low congestion over IP MPLS backbone

Local Access Connectivity

- Electrical: T-1/E-1/DS-3
- Ethernet: 10/100 Base T, Gig E

Rapid, Automated Provisioning

- Sales, Engineering, and Provisioning team dedicated to your account
- Single point of contact for fully managed provisioning of end-to-end Internet Access
- Web-based usage reports
- Industry-leading SLAs
- 24/7 Network Monitoring
