## **FiberNet Launches e-Commerce Extranet – [www.fibernetportal.com](http://www.fibernetportal.com)**

### **Customers Now Able to Price and Order New Services Online, 24/7**

**NEW YORK – May 22, 2007** – FiberNet Telecom Group, Inc. (NASDAQ: FTGX), a leading provider of complex interconnection services, today premiered its new e-commerce web portal, [www.fibernetportal.com](http://www.fibernetportal.com). The new extranet offers FiberNet's customers the ability to instantly receive price quotes and place orders for connectivity anywhere in the continental United States. Users are also able to order FiberNet's colocation services and monitor their IP and Ethernet traffic on FiberNet's networks.

The extranet provides access to FiberNet's network capabilities to deliver transport services to more than 60,000 carrier and enterprise locations and up to 130 million additional addresses nationwide.

"fibernetportal.com was specifically designed with our customers in mind," stated John Dowd, FiberNet Vice President of Business Development. "Ease of use was our focus." Registered users may log in to the extranet under authenticated accounts and personalize their interface to include frequently used information, such as key network locations.

"And, we are providing our customers with an online view into their FiberNet accounts, enabling us to more efficiently respond to their requests," continued Dowd. The personalized interface also includes a dashboard that displays all quoting activity and order history, providing a record for later review and enabling the user to place an order based upon a reserved quote.

The IP & Ethernet portion of the site provides authorized users the ability to monitor Ethernet and IP network bandwidth usage, assignments and routing; view gateway trunk groups and CDR reports for VoIP traffic; and manage their network via FiberNet's IP & Ethernet utilities.

"Our new web portal is an extension of FiberNet's business philosophy; fibernetportal.com is accessible around the clock to meet our customers' customized needs," said Jon DeLuca, FiberNet President & CEO. "It will be particularly beneficial for our international customers that utilize our extensive network capabilities in the United States."
